

How to Determine Your Sunsetter Awning Model Vista and XL

A- Measure Frame Width- (Should be an even foot number)

B- Measure Projection to determine your Sunsetter Model.

Model Vista has a 7', 9' & 10' 2" Projections depending on width of awning.
Model XL has an 11' 8" Projection on all widths.

Having a Manual or Motorized awning does not effect the size of your fabric.

Easy Ordering-

Select your Sunsetter Model Vista or XL, then select the width of your frame and fabric color.

*** Your fabric width will be 4 1/2" smaller than your frame width for a perfect fit.**

If you do not have a Sunsetter Brand awning, use this page to order new fabric for any brand of Retractable/Patio Awnings.
